

VyaparSarathi

Detailed Project Report

Structured decision-support report (bank / official hand-off)

Proposed business	pulses grocery store [user-stated] — stated as "I want to open a pulses grocery store"
Location	Bhagwanpur, Bihar [user-stated] — stated as "in Bhagwanpur, Bihar"
Report ID	DPR-9DF3C947297C75A3
Generated	09 September 2026, 09:30 UTC
Session	phase8-demo-bhagwanpur

Disclaimer

This is decision-support material prepared before capital is committed. It is NOT a loan sanction, an approval, a guarantee of viability, or financial advice of record. Every figure is either stated by the entrepreneur (and unverified), retrieved from a cited official document, produced by a deterministic calculation from named inputs, or an explicitly labelled assumption. Where an input or a piece of evidence is absent, the report says so rather than substituting a default. A bank or scheme authority's own appraisal and the official scheme rules remain authoritative.

Executive summary

Recommendation	Pivot [calculated]
Reason	dairy scores materially higher on local market evidence than the proposed business.
Market-data confidence	48% [calculated]
Financial status	Feasible with stretch [calculated]

Major strengths

- 4 settlements fall inside the catchment — this is a cluster, not an isolated village.
- Stated cash Rs 650,000 is at or above the typical figure (Rs 400,000) for a 'grocery' business on this indicative screen.

Major risks

- No data was available for the asset fit factor of the opportunity score.
- No data was available for the experience fit factor of the opportunity score.
- Competition is moderate — 5 direct competitor(s) within 5 km.
- A direct competitor sits 0.00 km away, within the 1.0 km 'very close' threshold.
- Sales run 20% below the base-case plan.
- Sales run 30% below the base-case plan.

Immediate next actions

- Seriously consider the alternative that scored materially higher: dairy.
- Take this report to a bank business-correspondent agent or the block office to begin scheme appraisal — the bank's own credit assessment remains authoritative.

Open evidence gaps

- Entrepreneur and project profile: Years of relevant experience — Not available from current evidence
- Opportunity and alternatives: asset_fit — Not available from current evidence — No assets recorded; asset fit was not scored.
- Opportunity and alternatives: experience_fit — Not available from current evidence — No trade experience recorded; experience fit was not scored.
- Financial assessment: Minimum cash — Not available from current evidence
- Financial assessment: Average DSCR — Not available from current evidence
- Scheme, compliance, and knowledge evidence: interest_rate_pct — Not available from current evidence — resolution status: no_evidence
- Scheme, compliance, and knowledge evidence: loan_tenure_months — Not available from current evidence — resolution status: no_evidence
- Scheme, compliance, and knowledge evidence: moratorium_months — Not available from current evidence — resolution status: no_evidence
- Scheme, compliance, and knowledge evidence: promoter_margin_pct — Not available from current evidence — resolution status: conditions_unresolved
- Scheme, compliance, and knowledge evidence: subsidy_pct — Not available from current evidence — resolution status: no_evidence
- Scheme, compliance, and knowledge evidence: licence_fee_inr — Not available from current evidence — resolution status: no_evidence
- Scheme, compliance, and knowledge evidence: security_deposit_months — Not available from current evidence — resolution status: no_evidence

Entrepreneur and project profile

Available Margin Capital	■6,50,000 (about ■6.5 lakh) [user-stated] — stated as "I have 6.5 lakh saved"
Proposed enterprise	pulses grocery store [user-stated] — stated as "I want to open a pulses grocery store"
Standardised category	grocery [calculated]
Years of experience	Not available from current evidence [not available]
Trade experience	None stated

Everything in this section was stated by the entrepreneur and has not been independently verified. It is carried through the analysis as declared.

Local market assessment

Resolved location	Bhagwanpur, Vaishali, Bihar [calculated] — geocoded from the stated location text
Market-data confidence	75% [calculated] — how completely the local market could be observed; NOT a viability measure
Direct competitors	5 [calculated]
Adjacent competitors	1 [calculated]
Nearest competitor	0 m [calculated]
Competition signal	Moderate [calculated] — 5 direct competitor(s) within the analysis radius (count level: moderate); direct density 0.064/km2 (density level: moderate); reported signal is the stronger of the two: moderate.
Market reading	Mixed [calculated] — a market-state description, not an action
Reading basis	Catchment is moderate (Catchment scale from Census 2011 population: 10,112 residents (coverage 100%) vs moderate 5,000 / large 20,000 -> moderate.) and competition is moderate (5 direct competitor(s) within the analysis radius (count level: moderate); direct density 0.064/km2 (density level: moderate); reported signal is the stronger of the two: moderate.); matrix[moderate][moderate] -> mixed.

Administrative hierarchy

Level	Value
Village / town	Bhagwanpur
Block / tehsil	Bhagwanpur
District	Vaishali
State	Bihar

Source coverage

Source	Detail
osm	8 raw, 8 normalised, 0 dropped (no coords); endpoint fixture://phase8-demo
De-duplication	8 before, 8 after, 0 merged

Demand signals

Signal	Value	Origin
Catchment population	10,112 residents, coverage 100%	sourced
Households	2,240	sourced
Settlements in catchment	4 (4 with population)	sourced
Public-service activity points	0 across 0 kind(s)	sourced
Demand-data confidence	48%	calculated

Data caveats

- Population figures are from Census 2011 (15 years old); local population may have grown or shrunk since.
- Observation quality is low (0.48). The market label is the best reading of thin evidence, not a firm conclusion.
- This is a market-state reading, not a recommendation. It does not say whether to open the business, and it does not compare alternatives.
- Catchment scale is a count of residents / settlements, not a measure of purchasing power, footfall, or willingness to buy.
- Confidence here measures how well the local market is observed, not whether the business will succeed. Low confidence never worsens the label.
- Competition reflects only businesses the configured sources listed; absence from the data is not proof of absence on the ground.

The nearby-business data is a partial, sourced sample (primarily OpenStreetMap, whose rural coverage is uneven), never the complete set of businesses in the area. Absence of a competitor in the data does not prove the business does not exist. Read every competitor count together with the source-coverage confidence beside it.

Opportunity and alternatives

Proposed-business score	60/100 [calculated] — weight coverage 60%
Stance	Alternative materially better [calculated]
Stance reason	'dairy' has a strictly stronger market label ('underserved' vs 'mixed'), sufficient evidence, a resolved capital fit, and a score 25 point(s) higher than the proposed 'grocery'.
Recommended pivot	dairy [calculated]
Market-data confidence	48% [calculated]

Score factor breakdown

Factor	Weight	Contribution	Why
market_opportunity	60%	60.0 [calculated]	Phase 2D market label is 'mixed' (decided at ladder rung 'matrix') -> 60/100.
asset_fit	25%	Not available from current evidence [not available] — No assets recorded; asset fit was not scored.	No assets recorded; asset fit was not scored.
experience_fit	15%	Not available from current evidence [not available] — No trade experience recorded; experience fit was not scored.	No trade experience recorded; experience fit was not scored.

Alternative businesses scored for this location & profile

Rank	Business	Score	Market reading	Capital fit	Reasons
1	dairy	85/100 [calculated]	Underserved	Affordable	Phase 2D market label is 'underserved' (decided at ladder rung 'matrix') -> 85/100.; No assets recorded; asset fit was not scored.; No trade experience recorded; experience fit was not scored.
2	food_processing	85/100 [calculated]	Underserved	Stretch	Phase 2D market label is 'underserved' (decided at ladder rung 'matrix') -> 85/100.; No assets recorded; asset fit was not scored.; No trade experience recorded; experience fit was not scored.
3	food_stall	85/100 [calculated]	Underserved	Affordable	Phase 2D market label is 'underserved' (decided at ladder rung 'matrix') -> 85/100.; No assets recorded; asset fit was not scored.; No trade experience recorded; experience fit was not scored.
4	livestock_services	85/100 [calculated]	Underserved	Stretch	Phase 2D market label is 'underserved' (decided at ladder rung 'matrix') -> 85/100.; No assets recorded; asset fit was not scored.; No trade experience recorded; experience fit was not scored.

Rank	Business	Score	Market reading	Capital fit	Reasons
5	agri_input	60/100 [calculated]	Mixed	Stretch	Phase 2D market label is 'mixed' (decided at ladder rung 'matrix') -> 60/100.; No assets recorded; asset fit was not scored.; No trade experience recorded; experience fit was not scored.

Caveats

- The candidate list is an MVP recommendation universe for rural micro-retail, not an exhaustive list of businesses that could work here. A business you named is always scored even if it is outside this list.
- Assets you already own can reduce what a project needs to spend. They do NOT count as promoter margin — margin is set by scheme rules and is decided at a later (financing) stage.
- The capital check is an indicative screen based on typical capital intensity, not a financial assessment. It does not mean a business is unaffordable, ineligible or impossible — detailed capital needs and financing come from the financial analysis stage.
- This analysis ranks options against each other on partial local evidence. It does not predict whether any business will succeed, and it computes no revenue, loan, EMI or repayment figure.
- A higher score alone is never a recommendation: an alternative is only called materially better when its market evidence is stronger AND sufficient AND its capital fit is resolved.

Project and operating plan

Business category	grocery [calculated]
Catchment radius used	5,000 m [assumed]
One-time project / setup cost	■5,00,000 (about ■5 lakh) [user-stated] — stated as "setting up will cost about 5 lakh"
Expected monthly revenue	■90,000 [user-stated] — stated as "about 90000 a month once it picks up"
Cost of goods (% of revenue)	82.0% [user-stated] — stated as "cost of stock is roughly 82%"
Monthly fixed operating cost	■9,000 [user-stated] — stated as "monthly fixed costs around 9000"

Only business and project information the entrepreneur actually stated is shown. No technical specification, layout, machinery list, or manpower plan is inferred — that detail is gathered separately during scheme appraisal.

Financial assessment

Feasibility & structure

Feasibility status	Feasible with stretch [calculated]
Deciding rung	stress_sensitive
Project cost	■5,43,000 [calculated]
Promoter cash contribution	■6,50,000 [declared config]
Required promoter margin	■54,300 [declared config]
Indicated loan	■4,88,700 [declared config]
Margin shortfall vs stated cash	■0 [calculated]
Financing structure	Term Loan [declared config]

Loan terms & servicing

Loan principal	■4,88,700 [declared config]
Interest rate	8% [declared config]
Tenure	84 months (7 years) [declared config]
Moratorium	6 months [declared config]
Monthly EMI	■7,617 [calculated]

Coverage & viability

Average annual DSCR	1.0716 [calculated]
First post-moratorium year DSCR	1.3241 [calculated]
Minimum cash balance	■6,13,700 [calculated] — in month 0
Cash on hand at EMI start	■6,37,352 [calculated] — EMI starts in month 7
Operating break-even month	1 [calculated]
Cash break-even month	0 [calculated]
Share of plan resting on assumptions	55.6% [calculated]

Named breaking point: 'revenue_down_20' (Sales run 20% below the base-case plan.) pushes the plan to unserviceable.

Stress scenarios

Scenario	Applied	Min cash	Negative months	Avg DSCR	Outcome
Revenue down 20	yes	■5,08,203 [calculated]	none	0.5894 [calculated]	Unserviceable
Revenue down 30	yes	■4,49,883 [calculated]	none	0.3482 [calculated]	Unserviceable
Margin down 300bps	yes	■5,27,643 [calculated]	none	0.6697 [calculated]	Unserviceable
Opex up 15	yes	■5,76,243 [calculated]	none	0.8706 [calculated]	Unserviceable
Ramp slower 2m	yes	■6,09,542 [calculated]	none	1.0302 [calculated]	Feasible
Lean season	no — no seasonality was supplied for this plan	Not available from current evidence [not available]	none	Not available from current evidence [not available]	—

Scenario	Applied	Min cash	Negative months	Avg DSCR	Outcome
Combined downside	yes	■4,40,568 [calculated]	none	0.3038 [calculated]	Unserviceable

Scheme, compliance, and knowledge evidence

Corpus: Corpus manifest v2 — 3 document(s), 14 chunk(s), 2 approved parameter row(s). This is a limited, incomplete corpus.

Requested: interest_rate_pct, loan_tenure_months, moratorium_months, promoter_margin_pct, loan_ceiling_inr, subsidy_pct, licence_fee_inr, security_deposit_months, gross_margin_pct, cogs_pct, inventory_days; category grocery; state Bihar

Resolved scheme parameters

Parameter	Value	Status	Citation	Conditions
interest_rate_pct	Not available from current evidence [not available] — resolution status: no_evidence	no_evidence	—	—
loan_tenure_months	Not available from current evidence [not available] — resolution status: no_evidence	no_evidence	—	—
moratorium_months	Not available from current evidence [not available] — resolution status: no_evidence	no_evidence	—	—
promoter_margin_pct	Not available from current evidence [not available] — resolution status: conditions_unresolved	conditions_unresolved	—	—
loan_ceiling_inr	20 Lakh [sourced · KB1]	resolved	KB1	—
subsidy_pct	Not available from current evidence [not available] — resolution status: no_evidence	no_evidence	—	—

Statutory fees / deposits

Item	Value	Status	Citation
licence_fee_inr	Not available from current evidence [not available] — resolution status: no_evidence	no_evidence	—
security_deposit_months	Not available from current evidence [not available] — resolution status: no_evidence	no_evidence	—

No verified evidence for

- interest_rate_pct
- loan_tenure_months
- moratorium_months
- promoter_margin_pct
- subsidy_pct
- licence_fee_inr
- security_deposit_months

The promoter-margin percentage and loan-to-cost ratio shown under 'Financing structure' are the SIH26091 problem statement's own declared financing structure — configuration this deployment states, NOT a rule retrieved from a scheme document. They are never presented as an official scheme fact.

Risks and SWOT

Strengths

- 4 settlements fall inside the catchment — this is a cluster, not an isolated village. (market_assessment.positive_signals.multiple_settlements_in_catchment)
- Stated cash Rs 650,000 is at or above the typical figure (Rs 400,000) for a 'grocery' business on this indicative screen. (opportunity.candidates[proposed].capital_fit)

Weaknesses

- No data was available for the asset fit factor of the opportunity score. (opportunity.candidates[proposed].components_missing)
- No data was available for the experience fit factor of the opportunity score. (opportunity.candidates[proposed].components_missing)

Opportunities

- 'dairy' has a strictly stronger market label ('underserved' vs 'mixed'), sufficient evidence, a resolved capital fit, and a score 25 point(s) higher than the proposed 'grocery'. (opportunity.recommended_pivot)
- dairy ranks higher in this location (opportunity score 85/100). (opportunity.candidates[dairy].rank)
- food processing ranks higher in this location (opportunity score 85/100). (opportunity.candidates[food_processing].rank)
- food stall ranks higher in this location (opportunity score 85/100). (opportunity.candidates[food_stall].rank)
- livestock services ranks higher in this location (opportunity score 85/100). (opportunity.candidates[livestock_services].rank)
- agri input ranks higher in this location (opportunity score 60/100). (opportunity.candidates[agri_input].rank)

Threats

- Competition is moderate — 5 direct competitor(s) within 5 km. (market_assessment.concerns.high_competition)
- A direct competitor sits 0.00 km away, within the 1.0 km 'very close' threshold. (market_assessment.concerns.competitor_very_close)
- Sales run 20% below the base-case plan. (finance.stress_results.revenue_down_20)
- Sales run 30% below the base-case plan. (finance.stress_results.revenue_down_30)
- Gross margin is 3 percentage points lower than planned. (finance.stress_results.margin_down_300bps)
- Fixed operating expenses run 15% above the base-case plan. (finance.stress_results.opex_up_15)

Structured risks

- This is a comparison of options and a financial screen, not a prediction of success. It does not replace a bank's own credit appraisal or a scheme's eligibility rules (CLAUDE.md §1, §32).
- Competition is moderate — 5 direct competitor(s) within 5 km.
- A direct competitor sits 0.00 km away, within the 1.0 km 'very close' threshold.

Mitigations / next checks

- Address the named breaking point before drawdown: 'revenue_down_20' (Sales run 20% below the base-case plan.) pushes the plan to unserviceable.

Data caveats

- Population figures are from Census 2011 (15 years old); local population may have grown or shrunk since.
- Observation quality is low (0.48). The market label is the best reading of thin evidence, not a firm conclusion.
- How well the local market is OBSERVED (the weaker of the Phase 2B and Phase 2C data confidences, times a tier penalty), NOT whether the business will succeed (CLAUDE.md §22). It never changes the label.

Assumptions, limitations, and evidence confidence

User-provided inputs (unverified)

Item	Detail
Available Margin Capital (liquid cash)	₹6,50,000 (about ₹6.5 lakh)
Proposed enterprise (as stated)	pulses grocery store
One-time project / setup cost (stated)	₹5,00,000 (about ₹5 lakh)
Expected monthly revenue (stated)	₹90,000
Cost of goods as a share of revenue (stated)	82.0%
Monthly fixed operating cost (stated)	₹9,000
finance: project_cost_inr	500000 inr
finance: monthly_revenue_inr	90000 inr_per_month
finance: cogs_pct	0.82 ratio
finance: fixed_opex_inr	9000 inr_per_month

Deterministic calculations

Item	Detail
Standardised category	grocery (from proposed_business_text, market.proposed.resolve_proposed_business)
Resolved location	Bhagwanpur, Vaishali, Bihar (from location_text, geocoding.nominatim)
Market-data confidence	75% (from discovery.coverage)
Direct competitors	5 (from analyze, discover)
Adjacent competitors	1 (from analyze, discover)
Nearest competitor	0 m (from metrics.direct_distance)
Competition signal	Moderate (from metrics.signal_basis)
Market reading	Mixed (from metrics, demand_signals)
Proposed-business opportunity score	60/100 (from market_opportunity, asset_fit, experience_fit)
Stance	Alternative materially better (from opportunity.ranking)
market_opportunity	60.0 (from assessment.label)
dairy score	85/100 (from market_opportunity, asset_fit, experience_fit)
food_processing score	85/100 (from market_opportunity, asset_fit, experience_fit)
food_stall score	85/100 (from market_opportunity, asset_fit, experience_fit)
livestock_services score	85/100 (from market_opportunity, asset_fit, experience_fit)
agri_input score	60/100 (from market_opportunity, asset_fit, experience_fit)
Recommended pivot	dairy (from opportunity.ranking, opportunity.stance)
Market-data confidence	48% (from demand_signals.coverage)
Business category	grocery (from proposed_business_text)
Financial feasibility status	Feasible with stretch (from finance.rung=stress_sensitive)
Project cost	₹5,43,000 (from cost lines, contingency, net working capital)
Margin shortfall vs stated cash	₹0 (from required promoter margin, stated liquid cash)
Monthly EMI	₹7,617 (from loan principal, interest rate, tenure)
Average annual DSCR	1.0716 (from cash flow, debt schedule)
First post-moratorium year DSCR	1.3241 (from cash flow, debt schedule)

Item	Detail
Minimum cash balance	■6,13,700 (from monthly cash flow)
Cash on hand at EMI start	■6,37,352 (from monthly cash flow)
Operating break-even month	1 (from revenue, operating costs)
Cash break-even month	0 (from monthly cash flow)
Minimum cash	■5,08,203 (from stress cash flow)
Average DSCR	0.5894 (from stress cash flow, debt schedule)
Minimum cash	■4,49,883 (from stress cash flow)
Average DSCR	0.3482 (from stress cash flow, debt schedule)

Average DSCR	0.8706 (from stress cash flow, debt schedule)
Minimum cash	■6,09,542 (from stress cash flow)
Average DSCR	1.0302 (from stress cash flow, debt schedule)
Minimum cash	■4,40,568 (from stress cash flow)
Average DSCR	0.3038 (from stress cash flow, debt schedule)
Share of plan resting on assumptions	55.6% (from finance assumption register)
Recommendation	Pivot (from opportunity.stance, finance.status)
Financial status	Feasible with stretch (from finance.rung=stress_sensitive)

Source-backed facts

Item	Detail
loan_ceiling_inr	20 Lakh [KB1]

Declared configuration (SIH problem statement, not a scheme rule)

Item	Detail
Promoter cash contribution	■6,50,000
Required promoter margin	■54,300
Indicated loan	■4,88,700
Financing structure	Term Loan
Loan principal	■4,88,700
Interest rate	8%
Loan tenure	84 months (7 years)
Moratorium	6 months

Explicit assumptions

Item	Detail
Catchment radius used	5,000 m — No catchment radius was stated; using the MVP default.
finance: promoter_cash_contribution_inr	650000.0 inr — No promoter contribution was separately stated; the entrepreneur's stated Available Margin Capital (liquid cash) is treated as the promoter's contribution under the declared SIH 10%/90% financing structure. State a contribution amount explicitly to override this.
finance: loan_principal_inr	488700.00 inr — SIH26091 problem statement's declared term-loan structure: project cost above Rs 1.40 lakh up to Rs 50 lakh, 90% funding up to Rs 45 lakh, 8% p.a., 7-year tenure, 6-month moratorium.

Item	Detail
finance: loan_interest_rate_pct	8 percent_per_annum — SIH26091 problem statement's declared term-loan structure: project cost above Rs 1.40 lakh up to Rs 50 lakh, 90% funding up to Rs 45 lakh, 8% p.a., 7-year tenure, 6-month moratorium.
finance: loan_tenure_months	84 months — SIH26091 problem statement's declared term-loan structure: project cost above Rs 1.40 lakh up to Rs 50 lakh, 90% funding up to Rs 45 lakh, 8% p.a., 7-year tenure, 6-month moratorium.
finance: loan_moratorium_months	6 months — SIH26091 problem statement's declared term-loan structure: project cost above Rs 1.40 lakh up to Rs 50 lakh, 90% funding up to Rs 45 lakh, 8% p.a., 7-year tenure, 6-month moratorium.

Unavailable evidence

- Entrepreneur and project profile: Years of relevant experience — Not available from current evidence
- Opportunity and alternatives: asset_fit — Not available from current evidence — No assets recorded; asset fit was not scored.
- Opportunity and alternatives: experience_fit — Not available from current evidence — No trade experience recorded; experience fit was not scored.

- Scheme evidence: no verified value for loan_tenure_months
- Scheme evidence: no verified value for moratorium_months
- Scheme evidence: no verified value for promoter_margin_pct
- Scheme evidence: no verified value for subsidy_pct
- Scheme evidence: no verified value for licence_fee_inr
- Scheme evidence: no verified value for security_deposit_months

Confidence notes

- This report was assembled and rendered deterministically from stored structured results. No language model drafted, summarised, or rewrote any section.
- Market-data confidence measures only how well the local market could be OBSERVED here. It is a separate measurement from financial feasibility: a plan can be financially sound with low market-data confidence, or financially weak with high confidence. Neither figure is multiplied into the other.
- How well the local market is OBSERVED here (the Phase 2C demand-data coverage; each candidate also carries its own competition-side coverage confidence). NOT a viability or success measure, and it never changes a score or the ranking (CLAUDE.md §22).
- How much of this plan rests on configured assumptions rather than stated or sourced facts. NOT a probability of success and NOT a measure of the business (CLAUDE.md §22).

fixed_opex_inr	user_provided	9000	monthly fixed costs around 9000	2	
liquid_cash_inr	user_provided	650000.0	I have 6.5 lakh saved	1	
location_text	user_provided	Bhagwanpur, Bihar	in Bhagwanpur, Bihar	1	
monthly_revenue_inr	user_provided	90000	about 90000 a month once it picks up	2	
project_cost_inr	user_provided	500000	setting up will cost about 5 lakh	2	
proposed_business_text	user_provided	pulses grocery store	I want to open a pulses grocery store	1	
radius_m	assumed	5000	—	1	

D. Glossary

Term	Definition
Available Margin Capital	The liquid cash the entrepreneur can put into the project. Physical assets are not counted here (CLAUDE.md §13).
Promoter margin / contribution	The share of the project cost the borrower must fund themselves. A scheme states its own required percentage; whether an asset counts toward it is a scheme rule.
EMI	Equated Monthly Instalment — the fixed monthly loan repayment after any moratorium, covering interest and principal on a reducing balance.
Moratorium	An initial period during which principal repayment (and sometimes interest) is deferred. Operating costs still run during it.
DSCR	Debt-Service Coverage Ratio = cash available for debt service ÷ debt due in the same period. Above ~1.25 is generally considered comfortable. Computed on a cash basis here (no depreciation add-back, no tax).
Break-even	The monthly revenue, or the month, at which the business first covers its costs (operating break-even) or its costs plus loan servicing (break-even incl. debt).
Working capital	Cash tied up in day-to-day operations — inventory and receivables, net of supplier credit — plus a cushion for the ramp-up months.
Catchment	The area a business can realistically draw customers from. Here it is a fixed-radius approximation; travel-time catchments are a later enhancement.
Market-data confidence	How completely the local market could be observed from available sources. Not a probability of success.
Opportunity score	A 0–100 comparison of candidate businesses for this location and profile. A ranking aid, not a prediction of profit.
